Topo Map, State of Oregon Map, Download Garmin .gpx file

Length and Elevation:

2 miles one way. Elevation gain of 500 feet and loss of 150 feet. Elevation at the trailhead is 450 feet, highest

point is at 600 feet. Lowest elevation is 450 feet.

Review: June 5, 2011.

Walk through the low elevation forest. on an steady uphill grade for the first .1 mile to a junction in a small saddle. Pass the saddle and start descending down switchbacks and cross Dog Creek on a single log bridge.

Because of the plentiful fall and winter rains, moss adorns the older trees and

the leaves of Vine Maple provide a colorful attraction in spring and fall. The trail comes into a large clearing drained by a small stream at the east end of the meadow and the trail crosses a log over the stream. It is interesting how the stream is wearing away the dirt and makes a small waterfall, like a micro-Niagara. The alders growing around the edges make a pleasant setting for the meadow and the trail skirts the meadow's edge. From here the trail gently loses elevation

After a few miles you reach a 4-way trail junction. Turn left onto the Kings Mountain Trail and walk the last .2 mile to the trailhead and parking area.

This is a nice hike and can be hiked most any time of year. The low elevation, creeks, and meadow also make the trail popular for mountain bikes.

Enjoy the photos!
